

As we prepare to transition from our existing KidCheck system to the new Church Center Check-Ins system we would ask that you check a few things on the Church Center app that you will need on your smartphone.

We would encourage you to download the App from the Apple Store or from Google Play. If you and/or your children were in the KidCheck database your information has been migrated into the new Check-Ins system. We would like you to check the information that is in Church Center to ensure that it is correct and up to date. Important information are any food allergies, birthday for children, cell phone and email, and HOUSEHOLD.

The Household is key to checking in your children. Please open the Church Center app and tap on the profile picture or icon in the upper right corner of the Church Center home screen...scroll down until you see "My Household" and see

who is set up in your household. If your household is not set up or incorrect, please contact the office ASAP with corrections. You can contact us from within the Household section of the app.

To Edit your profile information you can tap on your profile picture or icon in the upper right corner of the Church Center home screen. Then tap on your Name and it will take you to your personal information. You should be able to edit most of your data. If you can't, please contact the office to update or edit any information.
